- 6. Click the **Continue** button, Mac Mail will now attempt to detect the outgoing server settings. If the Outgoing Mail Security window appears, do the following and click **Continue** and then **Create**.
- Check the Use Secure Sockets Layer (SSL) box.
- In the Authentication drop-down menu, select Password.

That's it - you're all done!

Using IMAP Folders:

To simplify the organization of your messages, you can indicate which IMAP folders Mac Mail should use to store sent mail, drafts, spam, and trash.

- 1. Select **Mail / Preferences**, click the **Accounts** button located at the top of the window and click once on your **IMAP** account in the **Accounts** list.
- 2. Click the Mailbox Behaviours tab, clear all of the check boxes and close the Accounts window.
- 3. When prompted to save your changes, click the **Save** button.
- 4. In your **IMAP** folder, located in the **Mailboxes** pane (select **View / Show Mailboxes** to display the pane if it's not there), do the following:
- Click once on the Sent, Drafts, Spam, or Trash folder.
- Select Mailbox / Use This Mailbox For.
- Select **Sent, Drafts, Junk**, or **Trash** from the resulting list in the sub-menu.
- 5. The selected folder will disappear from your IMAP list, and will now reappear as the corresponding Mac Mail folder.
